The Master of Science in Information Systems program at the Robert H. Smith School of Business will prepare you to lead in the ongoing technology revolution. Mastering the technology used to organize and manage information will put you at the table with decision makers and can help your company gain a competitive advantage. You’ll learn the latest technical skills that will position you to work for a variety of organizations that are literally changing the world.

Located in College Park, Md., the program can be completed in as few as nine months. You’ll learn from some of the best minds in IS today. Our faculty serve as top consultants and advisors to Fortune 500 companies and multinational corporations.
