MAKE A GLOBAL IMPACT
Today’s supply chains are truly global. Demand in emerging markets is a key driver of corporate profit, forcing firms to become more strategic about how they reach those markets. As more manufacturing is outsourced, firms are becoming increasingly savvy about how they move products from the manufacturer to the buyer. These two trends raise the profile of supply chain management and its relationship to the bottom line.

SIMPLY THE BEST
The Master of Science in Business: Supply Chain Management program boasts an outstanding teaching and research faculty that consistently ranks among the top five American universities in research productivity in top-tier logistics, supply chain management and transportation journals. Our curriculum will prepare you to lead innovation that drives business growth, promotes efficiency and helps sustain the planet. You will also gain the relevant, real-world experience that is most sought after by recruiters.

Our Supply Chain Management Center, established in 1998, was one of the first of its kind in academia and is distinguished by state-of-the-art technology. Our Supply Chain Laboratory—one of the most technologically advanced research facilities in the world—trains students in industry-leading supply chain software.
