The Master of Science in Supply Chain Management at the Robert H. Smith School of Business will help you develop strong managerial skills and connect with supply chain executives from a cross-section of industries. Whether you’re a recent graduate or a manager, you’ll receive hands-on training in skills critical for supply chain executives, including project management, six-sigma, managing supply chain operations and achieving optimized performance with sophisticated software packages.

Located in College Park, Md., the program can be completed in 10 or 16 months. Our facilities are among the most technologically advanced in the world, and our pioneering Supply Chain Management Center is distinguished by state-of-the-art technology.
